

Instructions for Producing and Displaying AB2650 Placards

Attached are Word and PDF versions of the placards that would be used for identifying appointment trucks. A placard should be printed for each truck in your fleet that operate at the Port of Oakland. Each truck's license plate number must be pre-printed in the spaced labeled "License Number." The two remaining spaces must remain blank for printing. Placard should be printed or copied onto Astrobrite™ paper in Liffoff Lemon, which is the same color used for School Zone traffic signs. Once printed, the placard must be laminated (approximate cost of \$3:00 each).

Truckers must print in large legible lettering their appointment number and times (military) in the marked boxes with either a dry-erasable pen or grease pencil and display the placard on the driver's side dash or sun visor such that it will be visible to the terminal security guard at the entrance gate and does not obscure the driver's vision.

*The first three letters can be potentially used as an identifier for the marine terminal.

APL: Eagle Marine Services
APM: Maersk/Sealand
TTI: Total Terminals International
MTC: Marine Terminal Corp.
TBT: TransBay Container Terminal
TRP: TraPac
SSA: Stevedoring Services of America
